Dear Mr. Lang:

On March 13, 1992, Chris Cahnovsky, of my staff, conducted a site visit at your facility. A copy of the Used and Waste Tire Storage Site Inspection Report that was used during this site visit is included with this letter. During this site visit, the following discrepancies of the Part 848 Management of Used and Waste Tires and the Illinois Environmental Protection Act (the Act), Title XIV Used Tires were observed:

- 1) As stated in Section 55(d) of the Act (enclosed); Beginning January 1, 1992, no person shall operate a tire storage site unless, the owner or operator registers the site with the Illinois Environmental Protection Agency (IEPA). Please fill out parts A and B of the enclosed Used and/or Waste Tire Activity Notification and Registration Form and pay the required annual fee of \$100 pursuant to Section 55.6(b) of the Act.
- 2) Pursuant to Section 848.202(b)(4); Used or waste tires shall be drained of water on the day of generation or receipt. Tires at your facility are not drained upon receipt. If tires are altered (see definition Section 848.104) the same day they are received, then you would be in compliance with this section.
- 3) Pursuant to Section 848.202(b)(5); Tires should be altered or otherwise prevented from accumulating water, within 14 days of receipt. Again, if you altered your tires the same day you received them, then you would be in compliance with this section.
- 3) Pursuant to Section 848.202(b)(7); Used or waste tires shall not be accepted from a vehicle on which more than 20 tires are loaded, unless the vehicle displays a placard issued by the Agency under Subpart F. You will be in compliance with this Section, once you have submitted your permit application (enclosed) and it has been approved by the Agency.

- 4) Pursuant to Section 848.202(c)(4); Used or waste tires shall not be placed on or accumulated in any storage unit, unless the unit is no more than 20 feet high by 250 feet wide by 250 long. The tire piles located inside of your building are over 20 feet high.
- 5) Pursuant to Section 848.202(c)(1); A contingency plan, which meets the requirements of Section 848.203, must be submitted to the Agency and kept on file at your facility.
- 6) You are in apparent violation of Subpart C: Recordkeeping and Reporting because no records are being maintained at your facility pursuant to this Subpart.
- 7) Since there are over 5000 tires at your facility, you are required to comply with Subpart D: Financial Assurance. Please read this Subpart carefully. If you recycle the tires that are presently on site, and do not accumulate over 5000 again, then Financial Assurance would be unnecessary. However, if you are issued more than one written notice of violation within a calendar year, then Financial Assurance would be required if there are over 500 tires at your site.
- 8) Pursuant to 848.204(c)(1); If over 500 tires are stored within a building, a tire storage plan must be developed in conjunction with the local or state fire marshall. This plan must be developed in accordance with Section 848.204(c)(1) through (3).
- 9) Pursuant to Subpart F, a Tire Transporter Permit must be obtained by your facility.

Please use the enclosed checklist and the above information to aid you in bringing your facility into compliance with these new State regulations. A formal inspection of your facility will be scheduled in the upcoming months. If you should have any questions, please feel free to contact Chris Cahnovsky at 618/346-5120.

Sincerely,

ENVIRONMENTAL PROTECTION AGENCY
